# Important Safety Notice

## READ AND SAVE THESE INSTRUCTIONS

www.zephyronline.com

### **WARNING**

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT USE THIS FAN WITH ANY SOLID-STATE CONTROL DEVICE.

### **WARNING**

TO REDUCE THE RISK OF FIRE ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

- a. Use this unit only in the manner intended by the manufacturer, if you have questions, contact the manufacturer.
- b. Before servicing or cleaning unit, switch power off at service panel and lock panel to prevent power from being switched on accidentally.  
When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.

### **CAUTION**

For general ventilating use only. Do not use to exhaust hazardous or explosive materials and vapors. Take care when using cleaning agents or detergents. Suitable for use in household cooking area.

### **WARNING**

TO REDUCE THE RISK OF RANGE TOP GREASE FIRE:

- a. Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
- b. Always turn hood ON when cooking at high heat or when flaming food
- c. Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.
- d. Use proper pan size. Always use cookware appropriate for the size of the surface element.
- e. Keep fan, filters and grease laden surfaces clean.
- f. Use high setting on hood only when necessary.
- g. Don't leave hood unattended when cooking.
- h. Always use cookware and utensils appropriate for the type of and amount of food being prepared.

### **WARNING**

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A RANGE TOP FIRE, OBSERVE THE FOLLOWING:

- a. SMOOTHER FLAMES with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT.
- b. NEVER PICK UP A FLAMING PAN – You may be burned.
- c. DO NOT USE WATER, including wet dishcloths or towels – a violent steam explosion will result.
- d. Use an extinguisher ONLY if:
  1. You know you have a Class ABC extinguisher, and you already know how to operate it.
  2. The fire is small and contained in the area where it started.
  3. The fire department is being called.
  4. You can fight the fire with your back to an exit

### **WARNING**

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

- a. Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards. Including fire-rated construction.
- b. Sufficient air is needed for power combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent back-drafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA) and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) and the local code authorities.
- c. When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
- d. Ducted fans must always vent to the outdoors.
- e. If this unit is to be installed over a tub or shower, it must be marked as appropriate for the application and be connected to a GFI (Ground Fault Interrupter protected branch circuit).
- g. NEVER place a switch where it can be reached from a tub or shower.
- h. Make sure the power is off before installing, wiring or maintaining.

## WARNING

TO REDUCE THE RISK OF FIRE, USE ONLY METAL DUCTWORK.

## CAUTION

To reduce risk of fire and to properly exhaust air outside - Do not vent exhaust air into spaces within walls, ceilings, attics, crawl spaces or garages.

## OPERATION

Always leave safety grilles and filters in place. Without these components, operating blowers could catch onto hair, fingers and loose clothing.

The manufacturer declines all responsibility in the event of failure to observe the instructions given here for installation, maintenance and suitable use of the product. The manufacturer further declines all responsibility for injury due to negligence and the warranty of the unit automatically expires due to improper maintenance.

\*NOTE: Please check [www.zephyronline.com](http://www.zephyronline.com) for revisions before doing any custom work.

## ELECTRICAL REQUIREMENTS

### Important:

Observe all governing codes and ordinances.

It is the customer's responsibility:

- To contact a qualified electrical installer.
- To assure that the electrical installation is adequate and in conformance with National Electrical Code, ANSI/NFPA 70 latest edition\* or CSA standards C22.1-94, Canadian Electrical Code, Part 1 and C22.2 No.0-M91 - latest edition\*\* and all local codes and ordinances.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrician determine that the ground path is adequate.

Do not ground to a gas pipe.

Check with a qualified electrician if you are not sure the range hood is properly grounded.

Do not have a fuse in the neutral or ground circuit.

\*National Fire Protection Association Batterymarch Park, Quincy, Massachusetts 02269

\*\* CSA International 8501 East Pleasant Valley Road, Cleveland, Ohio 44131-5575

This appliance requires a 120V 60Hz electrical supply and connected to an individual properly grounded branch circuit protected by a 15 or 20 ampere circuit breaker or time delay fuse. Wiring must be 2 wire with ground. Please also refer to Electrical Diagram on product.

A cable locking connector (not supplied) might also be required by local codes. Check with local requirements, purchase and install appropriate connector if necessary.

# List of Materials

**MODELS:** AK7500ASX, AK7536ASX, AK7548ASX

## PARTS SUPPLIED

- 1 - Hood
- 2 - Baffle filters AK7500ASX, 3 - AK7536ASX, 4 - AK7548ASX
- 2 - Halogen light bulbs 3 - AK7548ASX (*pre-installed*)
- 1 - 10" round transition adapter (*for dual internal and external blowers*)
- 1 - External blower wiring (*for external blower*)
- 1 - Rectangular starting collar (*for single blower horizontal ducting*)
- 1 - 6" round to rectangular transition (*for single blower horizontal ducting*)
- 2 - Blower brackets (*for single blower horizontal ducting*)
- 1 - Hardware package

## HARDWARE PACKAGE CONTENTS

## PARTS NOT SUPPLIED

- Ducting, conduit and all installation tools
- Cable connector (if required by local codes)
- Single Blower Kit (CBI-600A)
- Dual Blower Kit (PBI-1100)
- External Blower Kit (CBE-1000)
- Heat Lamp Accessory
- Back Splash Accessory
- Duct Cover Accessory
- Wood Board to hang hood ( W x D x H )
  - AK7500ASX - 28" x 3/4" x 4"
  - AK7536ASX - 34" x 3/4" x 4"
  - AK7548ASX - 46" x 3/4" x 4"

# Installation – Ducting Calculation Sheet

Duct pieces		Equivalent number length x used =	Total
	3-1/4" x 10" Rect., straight	1 Ft. x ( ) =	Ft.
	6" Round, straight	1 Ft. x ( ) =	Ft.
	7"-10" Round, straight	1 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. 90° elbow	15 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. 45° elbow	9 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. 90° flat elbow	24 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. wall cap with damper	30 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. to 6" round transition	5 Ft. x ( ) =	Ft.
	3-1/4" x 10" Rect. to 6" round transition 90° elbow	20 Ft. x ( ) =	Ft.
	6" Round, 90° elbow	15 Ft. x ( ) =	Ft.
	6" Round, 45° elbow	9 Ft. x ( ) =	Ft.
Subtotal column 1 =		Ft.	

Duct pieces		Equivalent number length x used =	Total
	6" Round wall cap with damper	30 Ft. x ( ) =	Ft.
	6" Round roof cap	30 Ft. x ( ) =	Ft.
	6" round to 3-1/4" x 10" rect. transition	1 Ft. x ( ) =	Ft.
	6" round to 3-1/4" x 10" rect. transition 90° elbow	16 Ft. x ( ) =	Ft.
	7" - 10" Round, 90° elbow	15 Ft. x ( ) =	Ft.
	7" - 10" Round, 45° elbow	9 Ft. x ( ) =	Ft.
	7" - 10" Round wall cap with damper	30 Ft. x ( ) =	Ft.
	7" - 10" Round roof cap	30 Ft. x ( ) =	Ft.
	7" round to 3 1/4" x 10" rect. transition	8 Ft. x ( ) =	Ft.
	7" round to 3-1/4" x 10" rect. transition 90° elbow	23 Ft. x ( ) =	Ft.
Subtotal column 2 =		Ft.	
Subtotal column 1 =		Ft.	
Total ductwork =		Ft.	

**Maximum Duct Length:** For satisfactory air movement, the total duct length should not exceed 100 equivalent feet.

## Installation – Mounting Height & Clearance

Minimum mount height between range top to hood bottom should be no less than 26".

Maximum mount height should be no higher than 36".

It is important to install the hood at the proper mounting height. Hoods mounted too low could result in heat damage and fire hazard; while hoods mounted too high will be hard to reach and will lose its performance and efficiency.

If available, also refer range manufacturer's height clearance requirements and recommended hood mounting height above range.

**Vertical Ducting:**  
6" round minimum (single blower)  
10" round minimum (dual and external blower)

**Horizontal Ducting:**  
3-1/4"x10" minimum (single blower)  
No horizontal option available for dual or external blower

### DUCTING

A minimum of 6" round or 3-1/4" x 10" rectangular duct must be used to maintain maximum air flow efficiency for single blower and 10" round duct for dual and external blower.

Always use rigid type metal ducts only. Flexible ducts could restrict air flow by up to 50%.

Also use calculation (on page 5) to compute total available duct run when using elbows, transitions and caps.

**ALWAYS**, when possible, reduce the number of transitions and turns. If long duct run is required, increase duct size.

If turns or transitions are required; install as far away from hood duct output and as far apart, between the two as possible.

## WARNING FIRE HAZARD

NEVER exhaust air or terminate duct work into spaces between walls, crawl spaces, ceiling, attics or garages.  
All exhaust must be ducted to the outside.

Use metal ductwork only.

Fasten all connections with sheet metal screws and tape all joints with certified Silver Tape or Duct Tape.

### Some Ducting Options

## Installation – Specifications

top

\*10" transition used with dual and external blowers.

back

## ELECTRICAL

### WARNING

All Electrical work must be performed by qualified electrician or person with similar technical know how and background.

For personal safety, remove house fuse or open circuit breaker before beginning installation. Do not use extension cord or adapter plug with this appliance.

Follow national electrical codes or prevailing local codes and ordinances.

#### Electrical Supply:

This appliance requires a 120V 60Hz electrical supply, and connected to an individual, properly grounded branch circuit, protected by a 15 or 20 ampere circuit breaker or time delay fuse. Wiring must be 2 wire w/ ground. Please also refer Electrical Diagram labeled on product.

#### Cable Lock:

A cable locking connector (not supplied) might also be required by local codes. Check with local requirements and codes, purchase and install appropriate connector if necessary.

## Installation – Mounting the Range Hood

**⚠ CAUTION:** At least two installers are required due to the weight and size of the hood.

1. Measure distance from range top to hood bottom (**26" min**) Level and mark line A.
2. Plum and mark center line.
3. Mark mounting height line B. (**12 3/8" from line A**) (*This is the top of the board used to hang the hood*)
4. Mark center line of wood board and align top of board with line B. Secure wood board to studs using (4) M4 wood screws. *Wood Board Dimensions: (W x D x H)*
  - AK7500ASX - 28" x 3/4" x 4"
  - AK7536ASX - 34" x 3/4" x 4"
  - AK7548ASX - 46" x 3/4" x 4"
5. If horizontally ducting hood refer to hood specifications on page 8 for cut-out dimensions.
6. \*Hang hood on wood board and secure using (4) M4 x 16 screws.
7. Install blower(s). **Turn to page 11 for blower installation instructions.**
8. Install electrical.
9. Install duct work and duct tape.
10. Power up hood and check for leaks around duct tape.
11. Install optional accessories: duct cover (fig. 2-C), back splash (fig. 2-D), and/or heat lamp kit (fig. 2-E). (sold separately) For more detailed instructions refer to manual included with each accessory.
12. Reinstall baffle filters.

**NOTE:** If installing a back splash do not install screws at bottom of hood yet. There is a lip on the back splash that needs to be inserted behind the hood first.

fig. 1

fig. 2 - C

fig. 2 - D

fig. 2 - E

fig. 2

**PBI-1100A DUAL INTERNAL BLOWER WILL ACCOMODATE VERTICAL DUCTING ONLY**

Please turn to page 12 for instructions on installing CBI-600B in horizontal ducting mode.

1. Position blower plate over bracket on inside back of hood and pivot up. Secure plate to hood with (2) 10x3/16" screws. (blower pictured is a PBI-1100A)

2. Connect male end of blower wire to female plug in the hood. (plug is located inside the hood behind the control panel)

3. **Single Blower** – Connect 6" round duct work to blower collar.  
**Dual Blower** – Place 10" round adapter on top of hood and secure with (4) M4x8 screws.  
Connect 10" round duct work to 10" round adapter.

# Installation – CBI-600B Horizontal Ducting Conversion

**HORIZONTAL DUCTING IS ONLY AVAILABLE IF USING THE  
CBI-600B SINGLE INTERNAL BLOWER.**

1. Unscrew (4) screws holding blower to plate and remove blower.
3. Follow instructions on previous page and install blower plate into hood.

2. Cover round blower opening on blower plate with 6" round metal cap included with the CBI-600B. Secure with (3) 3.5x8 screws.

4. On the back of the hood, remove the (6) screws holding the rectangular cap to the hood.

5. Place round to rectangular transition adapter inside hood.

## Installation – CBI-600B Horizontal Ducting Conversion

6. Attach 6" round to rectangular transition adapter to hood with (4) M4x8 screws.

7. Attach blower brackets to blower with (4) 10x3/16" screws. (2) screws for each bracket.

8. Place blower into round end of 6" round transition adapter. Attach brackets on blower to blower plate with (4) 3.5x8 screws. (2) screws for each bracket.

9. Attach rectangular starting collar to hood using the (6) screws removed from the rectangular cap in step 4.

## Installation – External Blower Preparation

1. Place 10" round adapter on top of hood and secure with (4) M4x8 screws. Connect 10" round duct work to 10" round adapter.

2. Install threaded end of external blower wiring through external blower wiring knock out located inside the hood.

3. Place cap over threaded end of external blower wiring and secure by turning clockwise.

4. Connect 6 pin male connector from external blower wiring to 6 pin female connector on control board wire inside hood. Secure green ground wire from external blower wiring to ground screw on hood.

### CBE-1000: WIRING DIAGRAM

External Blower Wiring Box (hood)	White (common)	Junction Box (CBE-1000)
	White (common)	
	Black (high)	
	Blue (med)	
	Red (low)	
	Green (ground)	

NOTE: For instructions on mounting the external blower, please refer to the CBE-1000 manual included in the external blower packaging and on our website: [www.zephyronline.com](http://www.zephyronline.com)

## ① Blower On/Off

By pressing ①, the blower is switched On and Off. When switched on, the blower turns on at the same speed it was switched off at. When switched off the entire hood powers off, including the lights.

## ② Speed Selection

The 3 speed levels are selected by pressing ② to decrease and ③ to increase speed level. The display indicates speed level selected. Pressing ③ when the hood is off will also turn it on.

## ③ Delay Off

This is used for programmed shut down of blower and lights 5 minutes after the function is activated. Press ④ once, a dot displays in the lower right hand side of display ⑤ indicating the function is on. The hood will change to speed 1 and shut down after 5 minutes.

## ④ Lights On/Dim/Off

Switch lights On by pressing ⑤ once, again to dim and again to switch Off.

## ⑤ Display

Displays blower speed level and delay off status.

## Manual On/Off

Located behind the right side light panel is a manual power on/off toggle switch. This switch is used to manually cut power to the hood to perform a hard reset for troubleshooting purposes. Toggle between I (on) or 0 (off).

## Heat Lamps On/Off

Located on the right and left side light panel are manual power on/off toggle switches. These switches are used to turn the heat lamps on/off. Toggle between I (on) or 0 (off).

## Maintenance – Cleaning and Filter Removal

### SURFACE MAINTENANCE:

Clean periodically with hot soapy water and clean cotton cloth. Do not use corrosive or abrasive detergent, or steel wool/scouring pads which will scratch and damage surface. Do not use products containing chlorine bleach or orange cleaners.

For heavier soil use liquid degreaser.

After cleaning, you may use non-abrasive stainless steel polish/ cleaners, to polish and buff out the stainless luster and grain. Always scrub lightly using a micro fiber or clean cotton cloth and with grain.

### Stainless Steel Baffle Filters

The stainless steel baffle filters are intended to trap residue and grease from cooking. Although the filters should never need replacing, they are required to be cleaned every 30 days or more often depending on cooking habits.

Filters may be placed in dishwasher at low heat or soaked in hot soapy water. Dry filters and re-install before using hood.

#### Removing Baffle Filters

1. Push filter toward back of range hood using handles.
2. Pivot front of filter downward.
3. Remove filter by pulling away from hood.

#### Replacing Baffle Filters

Hood Model:	Part No.	Qty. to Order.
AK7500ASX	50210004	2
AK7536ASX	50210004	3
AK7548ASX	50210004	4

## REPLACING LIGHT BULBS

**CAUTION:** Light bulb becomes extremely hot when turned on.

**DO NOT** touch bulb until switched off and cooled. Touching hot bulbs could cause serious burns.

Make sure all power is turned off and bulbs are not hot.

Remove by turning bulb counter clockwise. **Note:** Bulb does not unscrew; it turns 60 degrees, stops and falls out.

If bulbs are difficult to turn due to prolonged use, firmly attach a glass suction cup approximately the diameter of the bulb or use a rubber/latex glove and turn counter clockwise.

Replacement bulbs are available at specialty lighting stores. Purchase type MR16 (GU-10) 35W halogen.

For Zephyr part numbers please turn to page 20 of the manual.

# Troubleshooting

## TROUBLESHOOTING PROCEDURES FOR TEMPEST I AND TEMPEST II

Issue	Cause	What to do
After installation, the unit doesn't work.	1. The power source is not turned ON.	1. Make sure the circuit breaker and the unit's power is ON.
	2. The power line and the cable locking connector is not connecting properly.	2. Check the power connection with the unit is connected properly.
	3. The switch board and control board wirings are disconnected.	3. Make sure the wirings between the switch board and control board are connected properly.
	4. The wires on control board are loose.	4. Make sure the wires on the control board are connected properly.
	5. The switch board or control board is defective.	5. Change the switch board or control board.
Light works, but motor is not turning.	1. The motor is defective, possible seized.	1. Change the motor.
	2. The thermally protected system detects if the motor is too hot to operate and shuts the motor down.	2. The motor will function properly after the thermally protected system cool down.
	3. Damaged capacitor.	3. Change the capacitor.
	4. The motor wire is not connected.	4. Make sure the motor wire is plugged into the molex connector.
The unit is vibrating.	1. The motor is not secure in place.	1. Tighten the motor in place.
	2. Damaged blower wheel.	2. Change the blower.
	3. The hood is not secured in place.	3. Check the installation of the hood.
The motor is working, but the lights are not.	1. Defective halogen bulb.	1. Change the halogen bulb.
	2. The light bulb is loose.	2. Tighten the light bulb.
	3. The wires on the control board are loose.	3. Make sure the wires on control board are connected properly.
The hood is not venting out properly.	1. The hood might be hanging to high from the cook top.	1. Adjust the distance between the cook top and the bottom of the hood within 26" and 36" range.
	2. The wind from the opened windows or opened doors in the surrounding area are affecting the ventilation of the hood.	2. Close all the windows and doors to eliminate the outside wind flow.
	3. Blockage in the duct opening or duct work.	3. Remove all the blocking from the duct work or duct opening.
	4. The direction of duct opening is against the wind.	4. Adjust the duct opening direction.
	5. Using the wrong size of ducting.	5. Change the ducting to correct size.
Heat lamp is not working.	1. Toggle switch is not in the on position.	1. Make sure the heat lamp power is ON.
	2. Heat lamp bulb is defective.	2. Change the heat lamp bulb.
	3. Heat lamp bulb is loose.	3. Tighten the heat lamp bulb.
Metal filter is vibrating.	1. Metal filter is loose.	1. Change the metal filter.
	2. Spring clip is broken.	2. Change the spring clip.

**TO OBTAIN SERVICE UNDER WARRANTY OR FOR ANY SERVICE RELATED QUESTIONS, please call:**  
**1-888-880-8368**

Zephyr Corporation (referred to herein as "we" or "us") warrants to the original consumer purchaser (referred to herein as "you" or "your") of Zephyr products (the "Products") that such Products will be free from defects in materials or workmanship as follows:

**Ten Year Limited Warranty for Parts:** For ten years from the date of your original purchase of the Products, we will provide, free of charge, Products or parts to replace those that failed due to manufacturing defects. We may choose, in our sole discretion, to repair or replace parts before we elect to replace the Products.

**One Year Limited Warranty for Labor:** For one year from the date of your original purchase of the Products, we will provide, free of charge, the labor cost associated with repairing the Products or parts to replace those that failed due to manufacturing defects. After the first year from the date of your original purchase, you are responsible for all labor costs associated with this warranty.

**Warranty Exclusions:** This warranty covers only repair or replacement, at our option, of defective Products or parts and does not cover any other costs related to the Products including but not limited to: (a) normal maintenance and service required for the Products and consumable parts such as light bulbs, metal and carbon filters and fuses; (b) any Products or parts which have been subject to freight damage, misuse, negligence, accident, faulty installation or installation contrary to recommended installation instructions, improper maintenance or repair (other than by us); (c) commercial use of the Products or use otherwise inconsistent with its intended purpose; (d) natural wear of the finish of the Products or wear caused by improper maintenance, use of corrosive and abrasive cleaning products, pads, and oven cleaner products; (e) chips, dents or cracks caused by abuse or misuse of the Products; (f) service trips to your home to teach you how to use the Products; or (g) damage to the Products caused by accident, fire, floods or act of God. If you are outside our service area, additional charges may apply for shipping costs for warranty repair at our designated service locations and for the travel cost to have a service technician come to your home to repair, remove or reinstall the Products. After the first year from the date of your original purchase, you are also responsible for all labor costs associated with this warranty.

**Limitations of Warranty. OUR OBLIGATION TO REPAIR OR REPLACE, AT OUR OPTION, SHALL BE YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS WARRANTY. WE SHALL NOT BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE PRODUCTS. THE EXPRESS WARRANTIES IN THE PRECEDING SECTION ARE EXCLUSIVE AND IN LIEU OF ALL OTHER EXPRESS WARRANTIES. WE HEREBY DISCLAIM AND EXCLUDE ALL OTHER EXPRESS WARRANTIES FOR THE PRODUCTS, AND DISCLAIM AND EXCLUDE ALL WARRANTIES IMPLIED BY LAW, INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.** Some states or provinces do not allow limitations on the duration of an implied warranty or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. To the extent that applicable law prohibits the exclusion of implied warranties, the duration of any applicable implied warranty is limited to the same ten-year period described above. Any oral or written description of the Products is for the sole purpose of identifying the Products and shall not be construed as an express warranty. Prior to using, implementing or permitting use of the Products, you shall determine the suitability of the Products for the intended use, and you shall assume all risk and liability whatsoever in connection with such determination. We reserve the right to use functionally equivalent refurbished or reconditioned parts or Products as warranty replacements or as part of warranty service. This warranty is not transferable from the original purchaser and applies in the United States and Canada.

**To Obtain Service Under Limited Warranty:** To qualify for warranty service, you must: (a) notify us at the address or telephone number stated below within 60 days of the discovery of the defect; (b) give the model number and part identification number and serial number; and (c) describe the nature of any defect in the Product or part. At the time of the request for warranty service, you must present evidence of your proof of purchase and proof of the original purchase date. If we determine that the warranty exclusions listed above apply or if you fail to provide the necessary documentation to obtain service, you will be responsible for all shipping, travel, labor and other costs related to the services.

**Zephyr Corporation, Service Department, 395 Mendell Street, San Francisco, CA 94124 1-888-880-8368**
